Vintage design with its own personality. It doesn't seem like a relax.

Additional table, designed to be placed in the position you want.

Great comfort when sitting upright, with inclination or fully open.

Possibility of independent headrest-backrest regulation without lowering the footrest.

AVALON is a new reclining modular sofa which runs out from the conventional design of sofas with a low folding back. Contrary to the majority trends imposed by the market, we wanted to create a generously sized backrest that we equipped with a new button effect inspired by the diamond-shaped buttoned backs of the 70s. This backrest, along with the design of

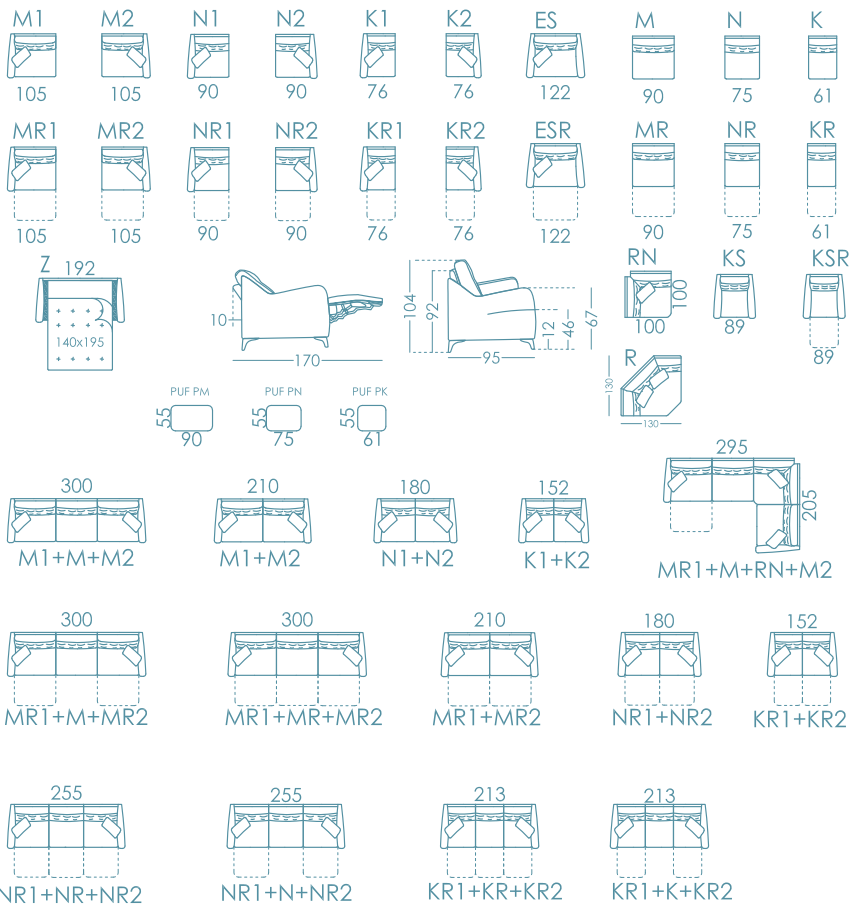

the arms and the 12 cm leg, make Avalon a different model with a great personality. But perhaps its main feature is the comfort; it is difficult, if not impossible, to find a relax sofa in the market that offers greater comfort than Avalon, comfortable both for very tall people and for shorter people. With the reclining mechanism open, it almost becomes a large bed.
